THE DIGITAL HUSTLER'S STARTER PACK

How to Launch Your First Online Business in The Bahamas

© 2025 KEMIS ACADEMY, A SUBSIDIARY OF KEMIS LTD., BAHAMAS.

📘 Chapter 1: Choose Your Hustle

🔹 Summary:

Before you make a dollar online, you need to know *how* you're gonna make it. Picking a niche means figuring out what kind of online hustle fits you best. This chapter helps you match your skills, interests, and resources to a proven way to earn. There's no "one-size-fits-all" here—just real options that actually work in the Bahamas.

🧩 What Is a Niche?

"A niche is just your little corner of the internet."

- A niche is the *topic* or *industry* you focus on.
- It helps you stand out so you're not trying to do everything for everyone.
- Think: Hair braiding tutorials, vegan meal plans, or selling island-inspired jewelry.

🔹 *Why it matters:* A clear niche helps you find your people—and your people are the ones who will buy from you.

🔍 Types of Online Hustles

Let's break this down into 4 simple paths:

1. Service-Based Hustles

"You do something for someone else."

- You sell your time, skills, or knowledge.
- Examples:
    - Graphic design

    - Social media manager
    - Virtual assistant
    - Tutoring (school or life skills)
- Tools you'll need: WhatsApp, Canva, Google Docs

🧠 *Tip:* If someone's already asking you for help with it, you can probably charge for it.

---

2. Product-Based Hustles

"You sell a thing."

- You can sell physical or digital products.
- Examples:
    - T-shirts or handmade jewelry
    - Digital planners or ebooks
    - Dropshipping products (AliExpress + Shopify)
- Tools you'll need: Shopify, Canva, Printify

🧠 *Tip:* If you're crafty or love design, this might be for you.

---

3. Affiliate & Commission Hustles

"You recommend a thing and get paid when someone buys."

- You don't make the product—you just promote it.
- Examples:
    - Amazon affiliate links
    - Partnering with local businesses for referral payouts
    - Influencer-style TikTok or YouTube
- Tools: Bitly, Linktree, social media

🧠 *Tip:* If you're good at convincing people or always sharing deals, this is gold.

---

4. Content Creation & Monetization

"You post, you grow, you get paid."

- You make content people enjoy, and then make money from ads, sponsors, or selling your own stuff.
- Examples:
  - YouTube
  - Podcasting
  - Blogging or TikTok
- Tools: YouTube, Canva, CapCut

🧠 *Tip:* If you love talking or creating, this hustle grows with time and passion.

🧪 Mini Hustler Quiz: Find Your Fit

Answer these 3 questions to find your starting point:

1. **What are you good at?**
   - (Ex: Talking, writing, designing, organizing…)
2. **What do people always ask you for help with?**
   - (Ex: “Can you fix my logo?” or “Help me study”)
3. **What do you enjoy doing even if no one pays you… yet?**

📌 **Result:** Match your answers to one of the 4 types above. That’s your starting point!

🚀 Next Steps:

- Circle one hustle that makes sense for *you.*
- Don’t overthink it—this is your *starting* hustle, not your *forever* hustle.
- We’ll help you turn it into real income in the next chapters.

📘 Chapter 2: Register Your Business

🔹 Summary:

Now that you've chosen your hustle, it's time to make it official. Registering your business isn't just about looking professional—it unlocks access to things like payment processors, bank accounts, and brand protection. In this chapter, you'll learn how to register your business in The Bahamas (even if you're starting with $0), and why you *might* consider a U.S. option if you're aiming to go global.

🇧🇸 Option 1: Registering a Business in The Bahamas

"Get legal, get confident."

🔹 What you need:

- A business name
- A valid form of ID (passport, NIB card)
- A local address
- A plan (even a basic one)

🔹 Steps:

1. **Search your business name**
    - Go to the Registrar General Department or MyGateway.gov.bs.
    - Make sure your name is available.
2. **Register as a Sole Proprietor (most common for starters)**
    - Low cost, easy to manage.
    - You and the business are the same entity.
    - You'll need to renew annually.
3. **Apply for your Business License**
    - Required by the Department of Inland Revenue (DIR).
    - Based on your business type, you may need additional approvals.

    - Submit online at inlandrevenue.finance.gov.bs
4. **Get your Taxpayer Identification Number (TIN)**
    - Needed to file taxes.
    - Comes with your business license.

💡 **Tips:**

- Use your **home address** if you don't have a shop or office.
- If you're selling online only, mark your category as "e-commerce" or "digital services."
- Cost: Usually around **$35** upfront. (sometimes lower)

🌍 Option 2: Registering a U.S. Business (Optional but Powerful)

"For those who want to use Stripe, Amazon, Shopify, etc."

If you want to accept **international payments** through tools like Stripe or run a dropshipping business—registering a U.S. LLC is the move.

🔹 **Steps:**

1. **Choose a U.S. state (recommend: Wyoming or Delaware)**
    - Low fees, privacy, online-friendly.
2. **Use a service like:**
    - Incfile.com
    - Northw st Registered Agent
    - ZenBusiness
3. **Apply for an ITIN (if needed)**
    - Some platforms require this to verify identity.
    - Takes a few days, but some agencies can fast-track it.
4. **Get a U.S. bank account (Mercury, Wise, Payoneer)**
    - Needed for Stripe payouts.
    - These work even for non-U.S. residents.

🧾 Local vs. U.S. Biz – Quick Comparison Table

Feature	Bahamas Business	U.S. LLC
Cost	~$200–$300	~$300–$500 (service fee)
Best For	Local services	Global e-commerce
Can Use Stripe?	❌ (usually)	✅
Can use PayPal?	✅ (limited)	✅ (fully)
Legal in Bahamas?	✅	❌ (must also register locally if selling here)
Setup Time	1-3 month	1–5 day

📌 End-of-Chapter Summary:

- **Decide where you'll register your hustle.**
  - If you're selling locally, start with The Bahamas.
  - If you're aiming for global income (Shopify, Stripe, etc.), consider the U.S. LLC route.
- **Make a simple list** of the steps you'll take this week. One step at a time.

📘 Chapter 3: Accepting Credit Cards & Payments

🔹 Summary:

You've got the hustle, your business is registered (or on the way), now it's time to get paid. Whether you're collecting payments from local Bahamians or international clients, there are tools that make it simple. This chapter breaks down the best options for sending invoices, accepting cards, and getting your money—fast and legit.

💰 Local Payment Options (Bahamas-Based Customers)

If you're selling to people inside The Bahamas, these are your go-to tools:

✅ Island Pay / Kanoo / SunCash

- Digital wallet apps, popular locally
- Easy for anyone with a phone to use
- You can send a payment link or QR code

🧠 *Good for:* Food vendors, hair stylists, tutors, and anyone doing direct person-to-person sales.

✅ Bank Transfers

- Most Bahamians still use RBC, Scotiabank, or FCIB for direct deposits.
- Send your account number + invoice.
- Use a simple invoice template in Word, Canva, or Google Docs.

🧠 *Good for:* Larger service projects or B2B sales.

✅ CashApp (with workaround)

- CashApp isn't available locally, but Bahamians often use it via U.S. accounts.
- You can link it to your U.S. LLC and bank account if you go that route.

🌍 International Payment Options (Global Sales)

If your hustle involves selling to people *outside* The Bahamas—this is where the game changes.

✅ PayPal

- Works in The Bahamas with some limits.
- You can send invoices and receive card payments.
- Requires a bank account to withdraw funds (some people use Payoneer or Wise).

🧠 *Tip:* Don't use "friends & family" for business—it can freeze your account.

✅ Stripe (with U.S. LLC)

- Stripe is the gold standard for e-commerce.
- Needs a U.S. business and bank account.
- You can create checkout pages, subscriptions, and payment links.

🧠 *Use it if:* You're selling digital products, dropshipping, or want a full store.

✅ Wise (formerly TransferWise)

- Multi-currency business account.

- Great for freelancers who get paid in USD, CAD, GBP, etc.
- Can be linked to Stripe, PayPal, and used to receive payments globally.

🔧 Tools to Make It Easy

Tool	What It Does	Good For
PayPal	Send invoices, get paid online	Freelancers, digital products
Stripe	Full payment processor	Shopify stores, SaaS, eBooks
Wise	Receives payments, converts currency	Remote work, global sales
Canva	Design invoices	Everyone (free templates)
Podia	Sell digital products easily	Coaches, creators, course sellers

---

🧾 Sample Invoice Setup (Free Hustler Style)

Even if you don't have a fancy setup, you can make a professional invoice in 10 minutes:

1. Open Canva → Search "Invoice"
2. Add your logo, name, phone, and bank/payment details
3. Add:
    - Description of service/product
    - Amount
    - Due date
4. Save as PDF and send via WhatsApp or email

📌 End-of-Chapter Summary::

- Choose **one way** to get paid locally.
- Choose **one way** to get paid globally.

- Create your first invoice or payment link today. Doesn’t have to be perfect—just real.

📘 Chapter 4: Creating a Simple Website

🔹 Summary:

You don't need to be a web developer to have a website. In fact, your first site should be so simple that it can be built in one day. In this chapter, you'll learn how to create a clean, professional site that shows off your hustle, collects payments, and builds trust with customers—without spending thousands of dollars.

🧠 Why You Need a Website (Even If You're on Instagram)

- It makes you look legit
- It gives people a place to learn about you 24/7
- You can collect leads, book clients, or sell your stuff
- You own it—Instagram can't shut it down

✨ The 1-Page Website Formula (Landing page)

If this is your first website, start with just **one page** that covers:

1. **Your Name + What You Do**
    - "I help small Bahamian businesses grow with social media."
2. **A Short Bio / Your Story**
    - 2–3 lines about why you do what you do
3. **What You Offer**
    - List your services or products
4. **Testimonials (if you have any)**
    - Even 1 or 2 reviews help!
5. **Call to Action**
    - "Book Now," "Message Me on WhatsApp," "Buy My Product"
6. **Payment Link or Contact Info**
    - Add PayPal, Stripe, or a WhatsApp button

🛠️ Free & Easy Website Builders

✅ Carrd.co

- Super simple, mobile friendly
- Great for landing pages
- Free plan available
- Paid plan = $19/year with custom domain

✅ Payhip.com

- Lets you sell digital products or services
- Built-in checkout system
- Free to start (they take a small % per sale)

✅ Canva Sites

- Drag-and-drop style
- Great for a free branded website
- You can publish in minutes

✅ Google Sites

- Totally free
- Works with your Gmail
- Not flashy, but functional

🌐 Buy Your Domain Name (Optional but Powerful)

- Domains = your business name with a ".com"
- Makes you look more official
- Use: Namecheap, GoDaddy, or Google Domains
- Cost: Usually $10–$15/year

🧠 *Example:* Instead of **bossgraphics876.carrd.com**, make it **bossgraphics.com**

💻 Basic Website Checklist

✅ Logo or Business Name
✅ What You Do (1-liner)
✅ Services or Products
✅ Contact Info / Booking Button
✅ Payment Link
✅ Social Media Links (optional)

📌 End-of-Chapter Summary:

- Choose one website builder.
- Draft your 1-page site using the formula above.
- Publish it by the end of the week—even if it's not perfect.

📘 Chapter 5: Getting Your First Customer

🔹 Summary:

Everything you've built so far is powerful—but it's not real until someone *buys*. Don't wait for the perfect logo, the most followers, or viral content. Your goal now is to get **one person** to say yes. This chapter will teach you how to find them, talk to them, and deliver results that turn into referrals.

👀 Step 1: Get Visible Where People Already Hang Out

You don't need ads to start. Just go where your people are:

- **WhatsApp Status** – Post your offer and a clear call to action.
- **Facebook Groups** – Answer questions and drop value (not spam).
- **Instagram/Facebook Stories** – Show your hustle in action.
- **Your Contacts** – Message 10 friends and say:
  "Hey! I just launched a [service/product]. Know anyone who might need this?"

🧠 *People trust people they know. Use that.*

🗣️ Step 2: Make a Simple Offer

Forget big price lists and long explanations. Just say:

> "I'm helping [type of person] solve [problem] with [your service].
> My first 3 clients get [bonus or discount]. Interested?"

🔹 Examples:

- "I'm helping new business owners set up their websites. First 3 clients get a free logo."

- “I do basic bookkeeping for side hustlers—$50 to get your income sorted.”

📦 Step 3: Make It Easy to Say Yes

Don’t create friction. Use:

- A simple booking link (Calendly, WhatsApp)
- A clean invoice or payment button
- A direct CTA: “DM me,” “Message me on WhatsApp,” or “Tap here to pay”

🤝 Step 4: Deliver Like a Boss

Overdeliver on your first few clients. Even if they paid $30.

- Be fast, clear, and professional.
- Ask for feedback.
- Ask for a testimonial (video or written).

This social proof builds your *next* 10 sales.

🔁 Step 5: Ask for Referrals or Reviews

> “Hey, if you know 1–2 people who could use what I offer, I’d love an intro.”

Don’t wait for it—they’re usually happy to help if you *ask*.

💡 Bonus: Micro-Launch Strategy

If you’re confident enough, drop a *mini-launch* post like:

🚨 New Service Alert! 🚨
I'm now offering [your service] for small businesses in The Bahamas.
First 3 spots are open now. Message me if you want in!
(Fast turnaround, fair price, pro quality.)

💬 DM me or tap the link to book 👉 [your link]

Use a clean graphic from Canva and repost it on:

- WhatsApp
- Facebook
- Instagram
- Threads
- Even LinkedIn (depending on the hustle)

📌 End-of-Chapter Summary:

- Send a personal message to 5 people with your offer today.
- Post your hustle *once* somewhere public.
- Create a simple client tracker (Google Sheet) and write the name of your first potential lead.

🎁 Bonus Section: Take It to the Next Level

You've got your foundation. Now here are some *next-level moves* you can take when you're ready to scale up and turn your hustle into something serious.

💌 Bonus 1: Build an Email List (Even If You Hate Email)

Why it matters:

- Social media comes and goes, but email is **yours**
- You can reach people directly without fighting the algorithm

How to start:

1. Sign up at Mailerlite or ConvertKit – both have free plans.
2. Create a freebie (discount code, checklist, or quick guide).
3. Offer it in exchange for their email.
4. Email your list once a week with value, tips, or promos.

📱 Bonus 2: Grow on Social with Purpose

You don't need to post every day—just be *intentional*.

3x per week game plan:

- **Monday:** Tip or tutorial (something helpful)
- **Wednesday:** Behind-the-scenes or progress shot
- **Friday:** Call-to-action (buy, book, share)

Use Canva to make everything look pro (and consistent).
Hashtags: Use a mix of local (#242hustlers, #BahamianBusiness) and niche-specific ones.

🧠 Bonus 3: Launch a Digital Product in 7 Days

Yes, you can sell something *you make once* and get paid over and over.

Ideas to try:

- Ebook (like this one!)
- Canva template pack
- Spreadsheet tool or checklist
- Tutorial video or webinar replay

Platform: Payhip, Gumroad, or Podia

Keep it simple: Write it in Google Docs, design a cover in Canva, sell it via link.
